

Why is everything such a big deal to you guys (FCC). First its Howard Stern on radio stations around the US, and now you are trying to take away stations that broadcast weather and traffic???? What gives, we pay for that service and we should get top notch programming which XM radio gives. If you don't like Howard Stern don't tune in! If you think that radio stations feel threatend by XM good because radio stations suck because of the FCC. I thought that the USA is a free country, I fight for my rights and for yours by being in the service. What are you guys going to take next from us????????????? If radio stations didn't suck we wouldn't have XM radio, but I'm glad that I have XM and plan on keeping it what ever you guys try to do. Thank you for your time Garrett Collings USN
